## PART I PHILOSOPHICAL-LOGICAL

<b>Logic of Scientific Kinds with an Application to Incommensurable Kinds</b>	3
Ian Hacking	
<b>Hat-Tricks and Heaps</b>	33
W. D. Hart	
<b>Frege and Grammar</b>	61
James Higginbotham	
<b>The Semantics of “All A’s are B’s”</b>	89
Julius M. Moravcsik	
<b>Quelques Méthodes Récentes de la Théorie de la Complexité et leurs Conséquences sur la Philosophie des Mathématiques</b>	107
Jacques Stern	

## PART II LOGICAL-MATHEMATICAL

<b>ZFJ and the Consistency Problem for NF</b>	141
M. Boffa	
<b>Nonstandard Analysis without Transfer</b>	145
Rolando Chuaqui	
<b>On Certainty in Mathematics</b>	163
F. R. Drake	

**Several Mathematical Postulates** 177

Kurepa Duro R.

**PART III MATHEMATICAL-COMPUTATIONAL**

**Logic of Using Rules in Recognition** 183

Kambiz Badie

**Categories of Information Systems** 195

Abbas Edalat and Michael B. Smyth

**Neural Network Realizations of Approximate Reasoning** 219

Caro Lucas
